About me

As a self-taught front end developer, I embarked on my coding journey in summer 2022 with a passion for creating innovative and user-friendly web applications. I am committed to continuous learning and growth. Moving on from my previous job, I decided to focus all my energy on programming to deepen my understanding of the field and further develop my technical skills. I believe that continuous improvement is the key to success, so I invest not only time but also passion and effort into my self-development.

Experience

Freelancing
Oct 2023 - Present

Actively acquiring skills in front end development through self-directed learning. Engaging with online courses, tutorials, and coding exercises to strengthen proficiency. Building practical projects to apply theoretical knowledge and showcase expertise. Dedicated to staying updated on industry trends and emerging technologies.

Infantry soldier
Lithuanian armed forces   Oct 2018 - Oct 2023 | 5 Years

As an infantry soldier, I served in a dynamic and challenging environment that demanded adaptability, discipline, and strong leadership skills.
This experience has equipped me with a strong work ethic.

Extruder Tuner
Intersurgical   Jul 2016 - Jul 2018 | 2 Years

Work in a team and individually, extruder start-up, coding, maintenance, and production testing
